原始碼(完整程式碼：<https://goo.gl/e9aF5g>)

```
public ActionListener movingAction = new ActionListener(){
    public void actionPerformed(ActionEvent e){
        String command = e.getActionCommand();

        //取得觸發事件之元件的動作命令字串
        //判斷動作命令字串以設定標籤內文字的對齊方式
        if(command.equals("Left"))
            movedObject.setHorizontalAlignment(SwingConstants.LEFT);
        else if(command.equals("Center"))
            movedObject.setHorizontalAlignment(SwingConstants.CENTER);
        else if(command.equals("Right"))
            movedObject.setHorizontalAlignment(SwingConstants.RIGHT);
        else if(command.equals("Top"))
            movedObject.setVerticalAlignment(SwingConstants.TOP);
        else if(command.equals("Bottom"))
            movedObject.setVerticalAlignment(SwingConstants.BOTTOM);
        else if(command.equals("Middle"))
            movedObject.setVerticalAlignment(SwingConstants.CENTER);
    }
};
```
